

### **LimeLight™ Facial**

**The LimeLight Facial improves skin tone and surface imperfections noted with aging and sun damage.**

**Treats the following conditions:**

- **Brown spots**
- **Uneven skin tone**
- **Tiny facial veins**
- **Diffuse Redness**

**Ideal Areas Treated:**

- **Face**
- **Neck**
- **Décolleté**
- **Hands**

**For optimal results, 3 treatments are recommended (may be greater number with greater sun damage) at intervals of 4 weeks.**

**Post treatment, brown spots will darken. Crusting begins within a few days and lasts 1-3 weeks. Skin may be red and swollen. This usually resolves within 24-48 hours. Makeup can be applied to cover the redness.**

**With any laser treatment, it is best to avoid sun exposure four weeks prior to treatment, during the course of treatment and indefinitely after treatment's are complete. Unprotected sun exposure may or may not have contributed to your condition, but it can certainly affect your results. Remember, all natural light causes sun damage and UVA is present all day long, through window glass and clouds.**
